

Bridge Hiring & Operations with HigherMe & Wizardline Integration for Domino's

Overview

Designed specifically for Domino's franchisees, this integration streamlines data flow from hiring to operations by automatically syncing new hire information from HigherMe to Domino's Pulse. Collect role-specific information during onboarding and ensure it's immediately available for operational reporting and management.

Ideal for Domino's franchise operators looking to eliminate manual data entry, minimize errors, and ensure new hires are fully prepared and operational from day one with all essential information accurately captured and organized.

Key Benefits

Effortless Data Sync

Automatically transfer new hire information from HigherMe to Domino's Pulse for seamless reporting and recordkeeping.

Customizable Data Collection

Configure which additional information (driver's license, vehicle details, food handler certification) to collect based on role or location.

Role-Based Requirements

Set position-specific required fields once, and the system enforces them for all similar future hires.

Operational Readiness

New hires arrive with all necessary data pre-organized and ready for immediate operational use.

Scalable Configuration

Easily adjust data requirements as your franchise grows or role needs change.

Success Stories & ROI

Operational Impact

- **50% Reduction** in new hire data entry time
- **Elimination** of data transfer errors between hiring and operations
- **Immediate Operational Readiness** for new hires with complete profiles

Franchise Benefits

- **Consistent Data Collection** across all locations
- **Streamlined Training** for managers with standardized processes
- **Enhanced Reporting Capabilities** with richer employee data
